

GLOBAL CONGRESS ON ADVANCES AND SCIENTIFIC MERITS IN FOOD AND AGRICULTURE

November 18 -20, 2019: Monday - Wednesday

Transforming Food & Agriculture to Achieve Sustainable
Development Goals & Global Food Security

DUBAI

Welcome

Dear Colleagues and Friends,

I consider it a great honour to invite you to Global Congress on Food and Agriculture to be held at Dubai during 18-20 November 2019.

The theme of this Conference "Transforming Food and Agriculture to achieve Sustainable Development Goals and Global Food Security" is particularly appropriate at a time new economic policies are being pursued in many countries. It is time to change, and we do have the potential in terms of scientific knowledge and technology to make changes that enhance our ability to improve food security and achieve sustainable development goals. I am extremely happy that the event is being held at an important time in our desire to achieve zero hunger by 2025.

I am highly optimistic that the scientific program of the global congress will provide an attractive platform to discuss the key issues for the future of the global food and agricultural systems in an international context from different perspectives and to develop solutions. The event has been designed to provide an innovative and comprehensive overview of the latest research developments in food and agriculture systems. I am confident, that the event would serve as a catalyst by connecting scientists within and across disciplines of food and agriculture sectors under a single roof. It would create an environment, conducive to information exchange, generation of new ideas and acceleration of applications that benefit society.

The event will have esteemed plenary speakers, reputed keynote speakers, active invited speakers and opportunities for young scientists and researchers to present their research. In addition, a variety of poster presentations along with workshops and special sessions would add value to put forward many thought provoking strategies for future line of action in food and agriculture systems.

I am looking forward to meet all of you in Dubai in November 2019 to make the event a grand success.

Dr. John Ryan (B.Sc. Agri, M.S., Ph.D., D.Sc. CPPS)

Conference Chairman

Recipient of Justus von Liebig Award 2018, the unofficial Nobel Prize of Soil Science

Senior Scientist, ICARDA, Aleppo, Syria, 1992-2012

Professor of Agronomy, University of Nebraska, 1987-92

Professor of Soil Science, American University of Beirut (AUB), 1975-86

Fulbright Scholar, University of Arizona, 1971-75

Scientific Sessions

1. Agronomy & Crop production
2. Crop Diversification
3. Horticulture and Floriculture
4. Soil Health & Management
5. Plant Breeding and Genetics
6. Climate change and Mitigation
7. GMO's for Plant resistance and Plant's Tolerance
8. Sustainable Agricultural Systems
9. Organic Farming - Production Marketing

Target Audience

1. Academic in agriculture
2. Scientists and researchers in agriculture
3. Agriculture Input Manufacturers
4. Agents & Distributors
5. Students of Food & Agriculture
6. Business entrepreneurs
7. Extension Service Providers
8. Bankers
9. Policy makers in agriculture
